

Jason Martin

Land Stewardship Manager

Mr. Martin is the Land Stewardship Manager for our Southeastern Region. His responsibilities include working with regulatory agencies to ensure compliance of WES projects, coordinating land management activities, securing credit releases for mitigation and conservation banks, coordinating monitoring and reporting for mitigation and conservation banks, and assisting with identification and reconnaissance of potential new restoration, mitigation, or conservation opportunities.

Mr. Martin's background includes mitigation bank establishment, land management for multiple objectives, and identification of mitigation and conservation lands. Prior to joining the WES team, he worked as a consulting forester advising clients on a wide range of activities. He has experience with timber management, prescribed fire, longleaf pine restoration, GIS, endangered species, conservation easements, stream construction, and wildlife management.

Mr. Martin received his Bachelor of Science degree in Forestry with an emphasis in Land Management from Auburn University. He is an Alabama Registered Forester and Certified Prescribed Burn Manager in Alabama and Mississippi. He is passionate about the use of prescribed fire as a land management and wildlife habitat improvement tool, particularly on private lands used for recreation and conservation. His love of hunting and managing land for waterfowl and upland birds has helped guide his career in land management and conservation.
