

## **Chloe Lewis**

Project Planner/Business Development Associate

Chloe Lewis is a Conservation Planner/Business Development Associate for the Rocky Mountain Region. Ms. Lewis assists in the reconnaissance, site acquisition, development, and compliance tracking of wetland and special-status species projects and mitigation banks. She works closely with different project managers and disciplines within the office as well as with a variety of federal, state, and local resource agencies to achieve regional entitlement goals. Ms. Lewis also coordinates and conducts outreach to clients, landowners, and key organizations to partner with Westervelt. These coordination efforts include large corporations, state and federal agencies, municipalities and other stakeholder groups across the region.

A native to Colorado, Chloe received a Bachelor of Science degree in Sustainability Studies in 2014, followed by a Master's degree in Environmental Management/Integrated Land Management from Western Colorado University in 2016. Prior to joining Westervelt, she was the Executive Director/Watershed Coordinator for the Middle South Platte River Alliance. She has previously worked for several government agencies and private firms. Her experience includes the assessment and monitoring of natural resources (vegetation, soils and water quality), Green House Gas accounting, climate change modeling, social vulnerability assessments, and strategic planning for community resilience and sustainability.
